INVADED!

EDITORIAL

CIBA-GEIGY: PROFITS FROM HUMAN AND ANIMAL SUFFERING

The N.A.L.L.'s recent occupation of Ciba-Geigy's vivisection plant pointed the finger of guilt at this secretive, Swiss-based drug company. Documents in the plant described experiments on baboons, as well as beagles and rats.

But Ciba-Geigy's policy of drug-promotion has meant hefty profits from human exploitation, especially in the developing countries. Their pricing policy is based on extracting the maximum amount of cash from any given country, for example, "MEXAFORM", Ciba-Geigy's anti-diarrhoea drug, costs twenty times as much in Upper Volta as it does in Switzerland. Confronted with such blatant examples of price-fixing, Ciba-Geigy would no doubt refer to the high cost of research in the pharmaceuticals industry. But, on average, the drug companies spend twice as much (20% of income) on advertising as they do on research (10% of income) "Research", of course, means anything from vivisection to research on packaging.

Ciba-Geigy's "MEXAFORM" and "ENTERO-VIOFORM" both contain clioquinol. In Japan in the 60's over 10,000 people suffered partial or total blindness as a result of taking 'ENTERO-VIOFORM', many ended up in wheelchairs. Ciba-Geigy paid out £350 million in compensation, and 'ENTERO-VIOFORM was withdrawn from the market in several developed countries. But in poorer countries such as India and Bangladesh, "ENTERO-VIOFORM" is still on sale, over the counter, in foil strips without any dosages or cautions. The Lancet also reported (28 May 1977) that certain companies were denying the risks associated with clioquinol, despite indications from animal experiments....but that's nothing now, as all N.A.L.L. activists should be aware.

Those who say that animal experiments are essential for human health may be dismayed to note that Ciba-Geigy have admitted spraying the pesticide 'GALECRON' on Egyption children. Names and other details of these unfortunate children were kept by the company - filed, next to the results from their animal laboratories, and referred to for the purpose of ensuring public safety, no doubt.

With a track record like this no wonder Ciba-Geigy was "upset about these allegations of torture" (Express, 25 July 1983)

And what has I.C.I. down the road got to hide? Their paranoia since the April demo has been very evident; a N.A.L.L. car parked at the main gate recently caused a flurry of activity in the security lodge, and the hasty arrival of two police vehicles. During the Ciba-Geigy occupation, some activists reported a greater number of police at I.C.I. than at Ciba-Geigy.

Can we stop the violence of the drug companies? Time will be the test of our determination. One thing is certain; the N.A.L.L. strategy will remain FLEXIBLE, and our actions will be ESCALATED as we see fit.

DIARY

MAY

23rd - N.A.L.L. goes to Liverpool Animal Rights Siege of the University's Psychology Dept.

28th - N.A.L.L. attends the Liverpool March

29th - Naller R. Griffiths runs the Marathon

JUNE

4th - Animals Film shown by T.A.L.L.

5th - " " " " Macclesfield

6th - N.A.L.L. General Meeting

8th - Leafleting at Piccadilly Rail Station befor General Election

18th - Wakefield March - Don't Eat A Battery Egg Week, C.I.W.F.

22nd - Nallers run-on: Cheshire Show

25th - Cherry Valley - Duck Pate Processing and Farm - Demo (Grimsby)

27th - Devon Eggs 4 in Court - Macclesfield

28th - N.A.L.L. visit to Freshnest Battery Farm in Timperley

SAVE THE ORKNEY SEALS

As you may have read in the last N.A.L.L. newsletter (No 7), Sea Shepherd are again organising large scale direct action in the Orkney Islands to prevent the annual mass slaughter of seals for profit. The murder licences last for 4 weeks from the last week in October, and during this time it is hoped to have at least 400 protesters on the islands consisting of groups from all over Britain each spending 1-2 weeks there. The N.A.L.L. are to send one such contingent and already have 25 names, but can take more. Our first obstacle is the cost of fully equipping, feeding and transporting these activists, and then making a contribution to Sea Shepherds massive expenses for fuelling their boats to carry us between the islands. The local N.A.L.L. groups are already organising events to raise this money (see Elsewhere) and all help is welcomed. A Seal Campaign co-ordinating group has been formed and will next meet on 24th August at 7.30p.m., at the Crown and Kettle pub, Great Ancoats Street. A Seal Fund account has been opened and donations are gratefully received c/o N.A.L.L. office.

CIBA-Geigy INVADED!

CIBA-GEIGY STORMED BY N.A.L.L. - JULY 24TH 1983

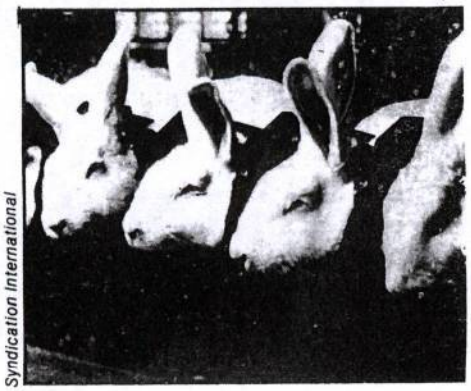

At exactly 2.30p.m. on Sunday 24th July 1983, 5 security guards at Ciba-Geigys vivisection labs in Wilmslow, Cheshire, rushed out of their guard house to find their site occupied by 80 people. Some of these people were inside their buildings, some were scaling the rooftops, and just as upsetting, a large crowd of 100 were chanting outside their main gate. There was nothing they could do but watch and wait for the police to arrive. After only word of mouth contact, the response was excellent, and at the meeting place in Knutsford an hour before the action, crowded vans from Liverpool, Sheffield, Bradford, Glasgow, Macclesfield were appearing by the minute without a police car in sight. In Manchester word had got to the Police that N.A.L.L. were planning something and at one of the meeting places, Police cars and vans surrounded the small group who were meeting at the Central Library. Fortunately, we had forseen this possibility and arranged another meeting place and managed to get the majority of Manchester Nallers to meet there - 4 vans. For the others they were supplied with 2 decoy vans who took the police by a roundabout way to I.C.I. vivisection labs at Alderley Edge, near Macclesfield - PANIC erupted at I.C.I. with guards and police blocking all entrances to this huge site. In fact there were more police at I.C.I. throughout the day than at Ciba-Geigy. The story was repeated at Manchester Medical School where the police thought there might be a demo, and a big guard was mounted. At 2.45 the decoy group drove to Ciba-Geigy, where they knew the site would already be occupied, which it was.

Meanwhile in Knutsford, drivers and protesters were given instruction sheets and maps and told of the plans for the day. The site chosen, Ciba-Geigy was well guarded by 3 perimeter fences, alarmed. A complicated plan was worked out entailing a group A1, who were to approach from the rear; A2 to occupy the rooftops approaching from a loose stretch of fencing at the front and Group B, who blockaded the entrance. The aims were to collect photographs and documents of experiments and types of animal abuse by Ciba-Geigy. By the end of the day most of the plan had worked very well, but due to difficulties, A1 were not able to enter and open up the buildings before A2 stormed in.

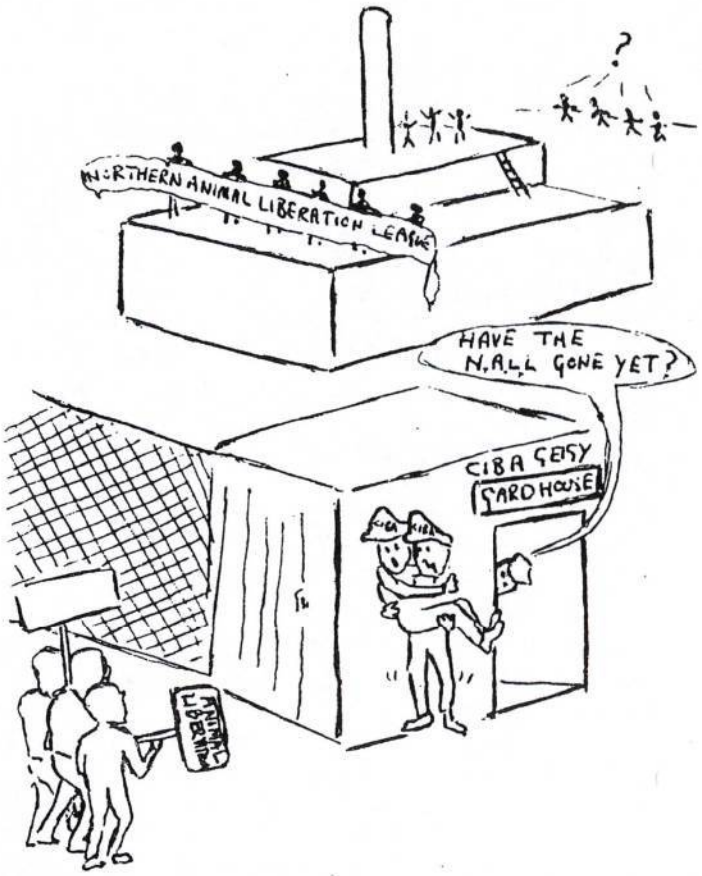

From Knutsford cars and vans made their way separately to a car park adjacent to Ciba-Geigy but out of sight of the guard house. Timing was excellent with all vehicles arriving within 1 minute of 2.25, thus preventing risk of being noticed. With the press following close on our heels we raced down the road and into the site via a temporary construction yard where the outer perimeter fence was at its weakest. Group B marched down the road to the main entrance. By the time the guards heard the alarms from the fence, about 80 people were on the rooftops of two separate buildings. In one building we saw 250 beagles, about 40 in each unit(the dogs had access to a small pen attached to each unit) We took two beagles from one unit and held them on the rooftop for the press and Group B to photograph and witness. New members and hardened campaigners were very moved by the sight of these healthy little dogs awaiting their terrible fate.

The police arrived at 2.35 and asked us to climb down, which we refused. At 2.40 Group A1 appeared from the rear and went into some open buildings to take photos and obtain documents - they found evidence of toxicity experiments on baboons and filmed the hundreds of beagles awaiting similar LD 50 and LC 50 (experiment where beagles are put in inhilation chambers and forced to breath toxic fly killer spray for long periods of time, 2-6

weeks) All the animals die a very painful death after weeks of convulsions, vomiting, diarhoea, atrophy of the testicles etc.A 30 foot banner with 'animal auchswitz' written on it was unfolded on one rooftop in sight of Group B and and the public on the main road. (Group B caused chaos at the entrance and on the main road outside, by burning an effigy, displaying placards and chanting loudly. We remained in occupation of the site for 1½ hours, having achieved our objectives and left with not one arrest. We collected at the main gate and a group went across the road to Brybour Kennels who supply dogs to Ciba-Geigy and Liverpool University. They entered the holding kennels and showed their anger at this immoral trade to the owners of the kennels. At about 4p.m. all vehicles went home intact, more determined

than ever to expose the massive commercial concerns behind much of the animal torture in the U.K. The press coverage, considering the absence of violence and arrests, was very good with a large article and two photos in the Daily Express, Daily Mail, Mirror, Star and local papers. Granada TV reported the next day with our pictures of beagles obtained inside Ciba-Geigy. Piccadilly Radio reported on the hour and with a N.A.L.L. interview on Sunday evening.

N.A.L.L. thanks everyone who came along. The lessons to be learnt are mainly that although it is getting harder and harder to outwit the police in arranging secret demonstrations - it is possible with sufficient planning beforehand and good organization on the day to reduce risk of arrest.

"WHO NEEDS THE DRUG COMPANIES?" - A BOOKLET BY THE HASLEMERE GROUP

The N.A.L.L. is firmly opposed to the use of live animals by drug companies such as I.C.I. and Ciba-Geigy. But all N.A.L.L. supporters should educate themselves about the role of these same companies in exploiting humans, particularly those in the Third World, for the sake of profit.

The booklet "Who needs the drug companies" takes a critical look at the questionable practices of the multinational drug companies - price-fixing, advertising and promotion, "me-too" marketing of duplicate drugs, the testing of products on illiterate people, etc.

Essential reading for N.A.L.L. activists, available from Grassroots Books (near Piccadilly Station), War on Want, (opposite the Medical School), or from War on Want, 467 Caledonian Road, London N7 9BE - price 50p only, plus postage.

ANTI-VIVISECTION MARCH IN LIVERPOOL

On the 29th May the N.A.L.L. took 4 van loads of people to a national march in Liverpool. The march was organised by M.A.R.C., Liverpool and Animal Aid, against Liverpool University's vivisection laboratories.

The turnout of 2,000 people was amazing and the mood of the demo very militant. This militancy showed itself when a large group of people broke through police lines and into the grounds of the University Medical School. A sit down protest followed the police refusing to allow this side demo back into the main body. There was only one solution and that was to break out - which is what happened resulting in fierce attacks by the police. Several demonstraters were injured and 34 arrested, including 1 Naller. As the police vanswere leaving 4 activists made a truly heroic attempt to escape - 2 were successful, but the rest were given a beating.

The march finished up at Liverpool University where overpaid academics conduct utterly pointless, painful experiments on primates, dogs, cats, rats etc.

Those arrested received harsh treatment at medieval Cheapside police station where they were thrown in cells for 10 hours and given no food or water, no phonecalls and charged with so called public order offences and booted out at 3-4 a.m. Later they appeared in court and most received bind overs.

FOUL ACADEMIC EXPOSED

Dr. GOUDIE is the arrogant careerist in charge of animal experiments at Liverpool University's Dept. of Psychology. He holds a Home Office licence to torment animals, with explicit permission to experiment on primates.

Dr. Goudie made a mistake recently; on Tues 24th May, in the middle of the Liverpool groups' week of action for animal rights, Dr. Goudie left his office unlocked and unattended. A group of seventeen activists took over the office and barricaded the door.

A search through the files and records revealed extensive data on primate experiments involving powerful drugs such as morphine. Details of these atrocities were read out over the phone to the local radio station. Slides of typically useless psychology experiments were also found - a rat drowning in a glass of water, primates huddled in a corner following doses of narcoties etc. Dr. Goudie was told, through the barricaded door, that he could enter his office if he agreed to take part in a telephone interview on Radio City. He declined, and scuttled off for assistance.

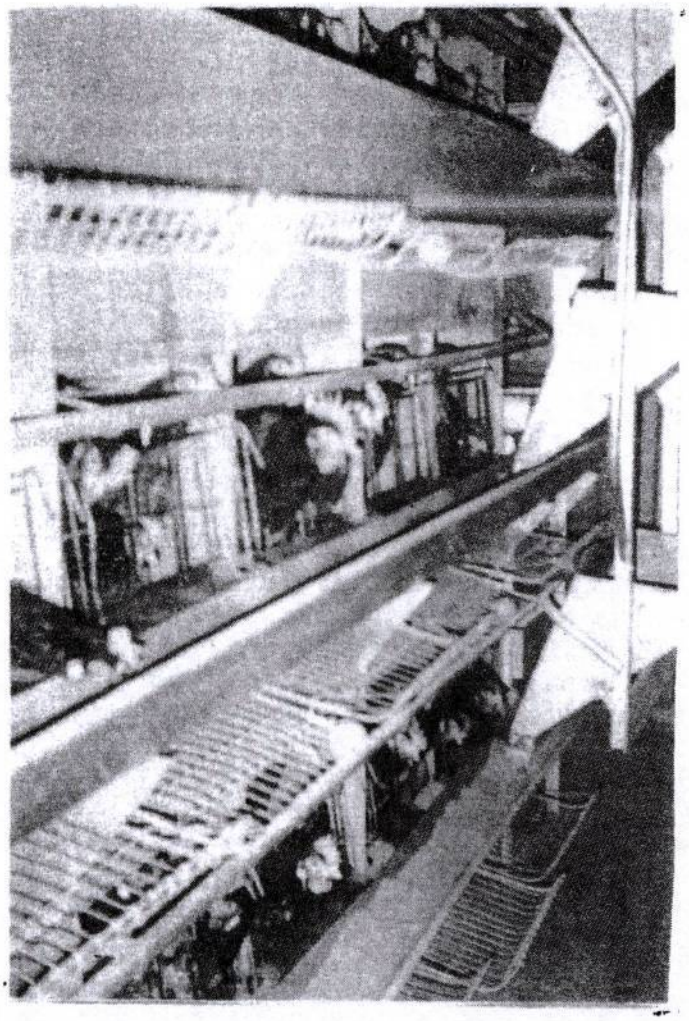

When the police arrived, all the occupiers were searched and arrested on suspicion of burglary, following the discovery of slides in one persons shoe. All except that person were released at about 11.0p.m. ,without charge. Julian Stock was charged with burglary and is pleading 'not guilty'.

Copies of some slides may be available later for showing the public what psychology experiments entail; contact the N.A.L.L. office (by letter only, please)

DEVON EGGS TRIAL

On 27th June the Devon Eggs 4 went to face trial for their heinous offences, Rev. E. Bromwich and Jacqui Clarke, both for Breach of the Peace and Obstruction (i.e. prevention of strangulation of a N.A.L.L. member) and Carl Jones and Andrew Casey, both for Breach of the Peace and Theft. The court house was full of N.A.L.L. supporters. We all pleaded 'not guilty' to Breach of the Peace but agreed to be bound over for 12 months for £100 except Carl, who was already bound over, for £150. We pleaded guilty to the other charges and were fined £25 each with a ridiculous £15 each costs. Before the sentences were announced the spectaters were warned any noise would result in removal of the offender and charges of contempt of court, but fortunately this was not necessary. We got front page coverage in the Manchester Evening News and Macclesfield Express and even a report in Poultry World. The fines could have been a lot heavier, the magistrates seemed to have a certain sympathy with our cause.

PHOTO TAKEN AT INSPECTION OF FRESHNEST BATTERY FARM, TIMPERLEY

The N.A.L.L. was invited to inspect Freshnest Battery Farm in Timperley by its owner Mr. Bendell who had phoned the office and spoken at great length about how humane his battery unit was, compared to the examples shown on the 'Goldenlay' leaflet. He kept 3 or 4 birds to a cage and several were debeaked, a painful process which causes some birds to die of shock,(note the debeaked hen at the bottom of the photo) The birds were kept 4 to a 1600 sq. cm. cage which meant they had only 400 sq. cms of floor-space each. This is less than the inadequate minimum recommended in the present U.K. codes, which is 460 sq. cms. Therefore the floor area per bird was a long way under the figure recommended by the House of Commons Select Committee. of 750 sq. cm per bird. Mr. Bendell emphasized the economic aspects of battery farming and seemed to think that because the birds are less intelligent than humans they don't suffer. In fact Mr. Bendell recognised this fact, he said 'There is cruelty here, I know'. He clearly did not take too kindly to having his views questioned, preferring to talk to the quieter members of the inspection team. When leaving the site, he said 'you've made an implacable enemy today' when he was told that N.A.L.L. would continue its campaign against battery farming.

WAKEFIELD DEMO - GOLDENLAY

On June 18th a demo organised by Chickens Lib and Compassion in World Farming was attended by several Nallers. On arriving we were handed out song sheets about Goldenlay hens which went to the tune of 'Pack up your troubles in your old kit bag' (Oh no!). We then marc ed, with about 250 others about 1½ miles mostly through the back streets of Wakefield to the Goldenlay H.Q., where we shouted at an empty building for about half an hour before marching back to the meeting place, the total demo, lasted little more than an hour.

We than went on to the memorial hall and had a little tea party against animal abuse, with jam tarts ans sosmix rolls for sale. How not to organise a demo!! The police joined in, except they didn't have to queue, getting preferential treatment in a special room of their own!

CHERRY VALLEY DEMO

On 25th June members of the N.A.L.L. attended a demonstration against Cherry Valley duck farm, organised by the Grimsby Friends of Animals. About 80 demonstrators turned up to protest about the force-feeding of ducks, whose swollen livers are then used to make pate de fois gras. The human equivalent of what is fed to the ducks is 28lbs of spaghetti, and some demonstrators carried plates of cooked spaghetti which were photographed by the press. Cherry Valley is one of the biggest producers of ducks in Europe. The ducks are reared in the deep-litter system and are exported to France where pate is a great delicacy.

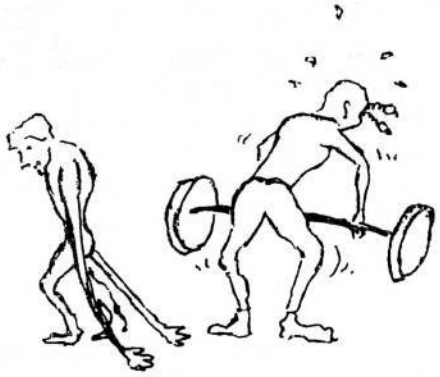

When the Nallers arrived (late) at the Cherry Valley processing plant, the rest of the demonstrators were standing outside the gates. We noticed a hole in the fence and climbed through. Security guards attempted to get us out of the grounds so we sat down and refused to move. Gradually other demonstrators outside came in and joined us.

After a while, we marched down to the farm itself - a massive complex about a ¼ mile down the road. We stormed the grounds and when police tried to move us we held another sit-down protest. We asked for permission for a couple of us to be shown around the farm but no-one from the management would come out and talk to us.

Eventually we left and went back to the processing plant where we later dispersed. All N.A.L.L. vehicles were followed by police vehicles.

TRAINING

Macclesfield N.A.L.L. have, until recently, been organising training. The N.A.L.L. believes training and fitness to be essential for members, as lab. occupations, hunts, etc. make great demands on stamina. After a break during the heatwave, training will soon begin again - contact the office for details.

N.A.L.L. would also welcome offers of help from supporters who may know something about training - P.E. instructors, rock climbers, etc.

ACTIONS AGAINST BLOODSPORTS

N.A.L.L. Hunt Saboteurs have been active, even out-of-season. On Sat. 11th June, Macclesfield N.A.L.L. arrived with about 80 other sabs to blockade the hounds of the DUMFRIESHIRE OTTER HOUNDS (Yes thats' in Scotland!) To ensure that the hound van could not break the blockade, the keys were kept in a safe place (i.e. in a hedge 150 yards down the road)

On June 22nd. Macclesfield N.A.L.L. organised a run-on during the parade by the CHESHIRE BEAGLES at the Cheshire Show. The Cheshire Beagles supporters are the chaps who gave a Liverpool sab. a triple fracture of the

jaw last March. There was extensive coverage in several local papers, also Radio Piccadilly, Radio Stoke, and Granada TV.

Another run-on when the NORTH STAFFS FOX HOUNDS paraded at Bingley Hall, Stafford was "Sabotaged" by the police, who ejected demonstrators within minutes. This indicates a LEAK during plannung - all activists take note.

HOMOEOPATHY - A NATURAL MEDICINE

Homoeopathy treats the whole person and deals with each person as an individual taking account of symptoms on every level; physical, emotional and mental; also a full account is taken of past illnesses and other important events in the patients' life as well as family medical history and the patients' current life style. Thus a full picture of signs and symptoms is obtained. Samuel Hahnemann, the founder of Homoeopathy found

that if a medicine could cause in a healthy person symptoms of disease this medicine would cure these or similar symptoms when found in the sick, (The Law of Similars) Hahnemann set about proving (or testing) various plants andminerals on himself, his friends and family and thus began to discover true healing agents. There is in Homoeopathic medicine no need to do tests on animals as these are useless in ascertaining their curative value to humans. Yet Homoeopathy is a complete medicine. Remedies can be made up in alchohol or sugar of milk, the latter is used only in the final stage for convenience of dispensing.

There is now a College of Homoeopathy and a Society which keeps a Register of properly qualified Homoeopaths. There is a class in basic Homoeopathy at 10 CLIFTON STREET, ALDERLEY EDGE; TEL:(0625) 585409 on alternate Tuesday evenings. Please phone this number for further details and information about Homoeopathy.

By Ernest Roberts B.A. R.S. HOM

TAMESIDE ANIMAL LIBERATION LEAGUE

"SET UP A STALL WHEN THEY LEAST EXPECT IT !", is a slogan suggested for the T.A.L.L. when hoards of Tamesiders turned up for the 2-day festival in Chester. Yet this group was well represented in the demonstrations at Carshalton, Wakefield, Grimsby and Liverpool, and formed 10% of those present when Ciba-Geigy least expected their fence to be breached. On the other hand some of our most active members were recruited during the blitz of stalls we have staged this year, and we hope that our last stall in Oldham has helped to launch a new group there.

Another recruitment success was our free showing of THE ANIMALS FILM in a large local theatre. This proved expensive, but was offset by donations on the day and money raised at a disco and a jumble sale - boyh during the next weekend. Following these successes we are holding another JUMBLE SALE on SAT 20th AUG, 2.p.m. at West End Community Centre, Ashton, and a DISCO,(fancy dress optional) at the Shakespeare, Fountain Street, Manchester, upstairs 8p.m.-1200, on Friday 26th August - offers of jumble and requests for disco tickets to us or N.A.L.L. office.

PETITIONS are generally regarded as 'useless', but our presentation of one to Stalybridge and Hyde M.P. Tom Pendry resulted in good local publicity and him demanding a Royal Commission in the Commons. We are now collecting one against the annual ORKNEY SEAL SLAUGHTER, which we will take to the Orkney on our sponsored cycle ride in early October. The event is to publicise and raise money for the SEA SHEPHERD CAMPAIGN in November, when we will send 6 of our members to the islands. On the first day of the 500 mile ride there will also be a

shorter 50 mile sponsored ride - all cyclists welcome. Similarly we would also welcome participation in our 3-legged fancy dress sponsored walk on September 17th, again for the Seal Campaign.

Looking further ahead we are now collecting toys in good condition for our Christmas Fair. More immediately we are preparing for an active regular campaign against bloodsports as the season now approaches. "INTO THE MUD WHEN THEY'LL HAVE TO PUT UP WITH IT!!"

T.A.L.L., c/o 103 Stamford Road, Audenshaw, Manchester m34, or c/o N.A.L.L. office.

WORLD DAY DEMO RESULTS - CARSHALTON 4

One Naller was fined £50 for obstruction - legal aid was refused and he defended himself with the police story being a complete fabrication. 2 Nallers were totally aquitted, mainly due to excellent photos and sound witnesses (KEEP THIS IN MIND FOR FUTURE DEMOS) 1 Naller has still to appear in September for obstruction (He was actually assaulted by police whilest taking photos (complaint against police proceeding)

N.A.L.L. FINANCES

General Situation; insufficient liquidity; fund rainsing needed.

N.A.L.L. wishes to thank the anonymous donor of £20 towards the Defence Fund, and all others who have sent money.

LOCAL GROUPS

It was agreed at a N.A.L.L. Groups Planning Meeting that there are three areas which require funding:

1) N.A.L.L. general costs - transport, office, printing, phone etc.

2) N.A.L.L. local groups' own funds.

3) N.A.L.L. Defence Fund which is now PERMANENTLY open for contributions towards legal costs, fines, etc.

MEMBERS

N.A.L.L. policy has always been to encourage active participation by all members - money is never a substitute for action. However, for individuals outside the N.A.L.L. "central area", or are unable to be active, we urge them to start fundraising activity. You should contact the office for leaflets and sales goods. With more money coming in, N.A.L.L. will be in a position to increase the transport subsidy to demos etc.

OLDHAM AND SADDLEWORTH GROUP

On 26th July the first meeting of the Saddleworth and Oldham Animal Liberation League at the Grotton Hotel with speakers Phillip Jones and Steve Hirst. They plan to get involved in the battery egg campaign, with exposure of local battery farms, and a jumble sale will be organised. A stall was also held in Oldham on 30th July.

PHOTOCOPIER

Out of the blue we were offered a brand new photocopier for the office by a Manchester company. We gratefully accepted and now pay only 1.5p a copy, towards service costs and NO RENT. This machine has been working night and day in the struggle for animal rights and we would like to thank those who generously made the donation.

QUIZ

QUIZ - GREAT PRIZE : FREE TRANSPORT TO THE NEXT FIVE DEMOS!!!

OR - TWO LATEST N.A.L.L. T-SHIRTS

1) Who is Chairman of Ciba-Geigy?

2) Who is pictured on page two of this newsletter?

3) What Conservative Euro-M.P. for Central London is a director of Ciba-Geigy?

4) What honour did Dr. Barry Cross (Director of Babraham A.R.C.) receive after the N.A.L.L. raid on that establishment?

5) Who is the retiring master of the Royal Rock Beagles, and what post will he now be holding?

6) On what hunt last season did Nallers and saboteurs find a large cage for trapping live foxes?

7) What I.C.I. household product is being promoted as a market leader? (Hint: get a copy of I.C.I. Annual Report 1982!)

8) What do the following vivisection terms mean:
(i) LC 50 (ii) CTL (a building) (iii) HRC (iv)in vitro
(v) in vivo (vi) vocalisation (vii) BIBRA (viii) ARC

9) What is the oral LD 50 in mice of I.C.I.'s drug VIVALAN?

10) What animal exploiter lives at Great Witchingham Hall?

11) Name any one class of animal experiment or procedure not covered by the 1876 Cruelty to Animals Act?

RULES

i) Entry fee is two second-class stamps

ii) N.B. You may omit ANY ONE question, i.e. only TEN answers need be submitted.

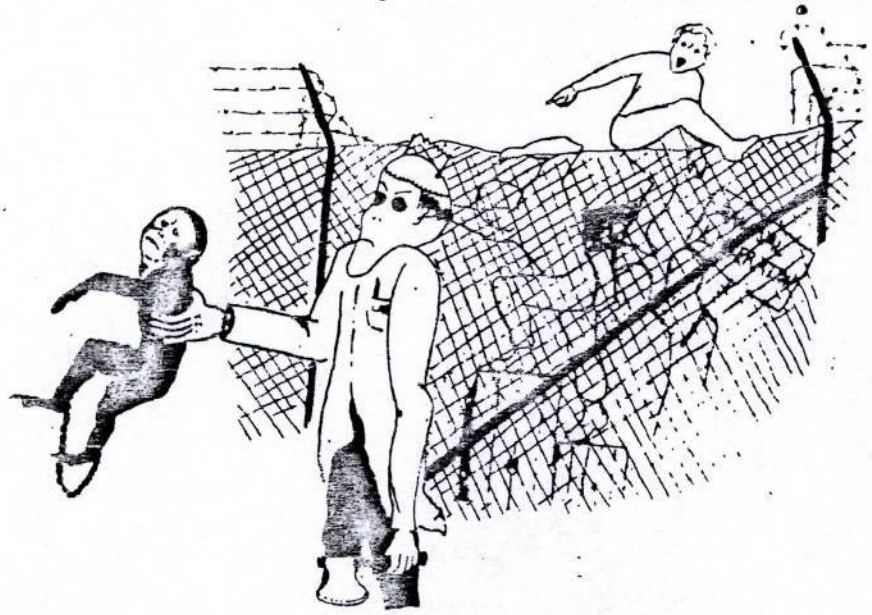

iii) Entries must be sent in to N.A.L.L., 8-10 Great Ancoats Street, Manchester, M4 5AD, by september 1st 1983.

iv) First ten correct answers in wins!!

LATEST N.A.L.L. T-SHIRTS AND BADGES

OVER THE FENCE

when they least expect it!

Northern Animal Liberation League

We now have two different designs of T-Shirts available ... both carrying the N.A.L.L. slogan, "Over the Fence - When they least expect it".

These excellent T-Shirts are only £2.50 each, in either white or blue, all sizes. Buy one - wear it - and be recognised !!!

The new N.A.L.L. badges are specifically attacking I.C.I. and Ciba-Geigy, our local enemies of the Animal Rights Movement - they are 25p each; bulk discounts available.

Please include postage if ordering by post - 30p for T-Shirts, S.A.E. for small numbers of badges.

T-SHIRTS

MEETINGS

TUESDAY 23rd AUGUST - Tameside General Meeting 7.30 p.m., Pit and Nelson pub, Ashton-under-Lyne Town Centre

MONDAY 5th SEPTEMBER - N.A.L.L. General Meeting, 7.30 p.m., County Hall, Piccadilly Gardens, Manchester

FUND-RAISING

SATURDAY 20th AUGUST - Jumble Sale 2.00p.m., at West End Community Centre, Ashton-under-Lyne

FRIDAY 26th AUGUST - T.A.L.L. Disco, Shakespeare hotel, Manchester(behind Lewis's) 7.30p.m.- 1.00 a.m. Admission 50p

SATURDAY 27th AUGUST - N.A.L.L. Buxton Animal Welfare Fair, Pavilion Gardens, Buxton.

SATURDAY 17th SEPTEMBER - 3-legged fancy dress sponsored walk in Tameside, - Seal Campaign.
